CAREER OBJECTIVE

Full-stack software engineer with an education in computer science. Motivated self-starter with a persistent drive to succeed, and I am looking for opportunities to learn and develop new skills. Passionate about development as the vehicle for making positive social change through teaching others the love of technology. I'm focused on building intuitive, user-friendly applications, to ultimately improve the user experience.

EXPERIENCE

BACKEND DEVELOPER

Lightstorm Entertainment, Manhattan Beach, CA / Jul 2019 – Present

- Member of development team responsible for the implementation of essential applications for the production of Avatar sequels.
- Create RESTful APIs as well as maintain and tweak previous endpoints for a browser-based digital asset management and human workflow system.
- Design mapping schemas using Elasticsearch for improved query performance.
- Manage and maintain MySQL databases using Python and writing Java code for CRUD operations.
- Troubleshoot network connectivity errors and check server logs for any inconsistencies.
- Support the frontend team by sharing information on how to properly access data from our web services.
- Resolve reported issues and reply to queries in a timely manner.
- Help improve code quality by implementing the recommended best practices.

Full Stack Web Developer

Freelancer, Los Angeles, CA / Aug 2018 – Present

- Create web models and prototypes that include interface, logical, and data models.
- Develop web site maps, application models, image templates, or page templates that meet project goals, user needs and standards.
- Develop Databases that support web applications and web sites.
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers, devices, or operating systems.
- Create searchable indices for web page content.

Smart Device Repair Technician

Self-Employed, Los Angeles, CA / Sep 2014 – Jul 2018

- Provided optimal customer service experience by meeting clients' needs resulting in repeat clients.
- Troubleshoot different smart devices to determine source of problem.
- Repaired units by opening, disassembling, and replacing parts.
- Handled warranty paperwork and educated clients on their device.
- Walked clients through the recommended problem-solving steps.

PROJECTS

Nate Limousine Services

www.natelimoservice.com
